

WARD MARITIME GROUP

Maritime Consulting • Operational Support • Technical Oversight

Capability Statement

Ward Maritime Group provides practical maritime consulting support for vessel operations, shipyard periods, bridge systems, technical oversight, and remote-area projects. The company is built around real-world maritime experience and practical execution rather than generic advisory language.

Core Capabilities

- Operational support for vessel owners, operators, bridge teams, and project managers
- Shipyard oversight, punch list management, readiness reviews, and sea trial support
- Bridge operations support, ECDIS configuration review, and navigation systems assessment
- Remote-area planning and operational coordination for challenging environments
- Recreational vessel advisory, refit planning, boat selection, and trip-of-a-lifetime planning

Operating Experience

Experience spans Pacific crossings, Southeast Asian operations, the Great Lakes, Gulf of Mexico, the Bahamas, and the U.S. East Coast, with background in bridge operations, ECDIS and navigation systems, shipyard coordination, and technical readiness.
